MASTON CANDY EFFECT is a fast-drying translucent coating, which mimics the look of anodized pearl aluminum. For indoor or outdoor applications. Quick application process - apply over metal, glass and most plastic surfaces. The color depth can be intensified by spraying more layers.

INSTRUCTIONS: Clean the surface of dust, grease and other contaminants. Use plastic primer for plastic surfaces. Shake the can for 2-3 min. Test painting is recommended on a small, invisible area. Start painting outside the object, move slowly on the object and paint around 25 cm from the surface. First spray a very light gauzy coat, wait for about 3 minute before painting a new layer. Touch-dry 20min. Dry 24h. Coverage 1m².
