

## PLASTIC PRIMER

COVERAGE

STRONG BOND

FLEXIBLE

QUICK DRYING

MASTON PLASTIC PRIMER is a transparent primer especially developed to be used on different plastics before painting, excluding very soft plastics such as polystyrene. The plastic primer works as a "chemical sandpaper" and creates an invisible, microscopic structure on plastic surfaces. The structure and the bonding additives promote the adhesion of the paint on plastics. The primed surface can be overpainted with any primer or paint. We recommend testing the suitability of the primer first on an invisible area.

**STORAGE STABILITY:** 60 months

**SIZE:** 400ml

**SALES QTY:**  
400ml: 6 pcs

**RECOAT:**  
always, 5 minutes in between layers
