

PU-CLEANER

MASTON PU-CLEANER a cleaning agent for removing polyurethane foam Maston PU-Cleaner is an efficient cleaning agent for removing fresh polyurethane foam, including that from bottle valves and foam guns. It is also suitable for removing glue and grease from metal surfaces prior to silicone or polyurethane foam treatment. For optimum results in removing fresh foam stains: Install the nozzle. Spray the cleaning agent onto stains, let it take effect and wipe clean. If required, repeat the procedure. It is also simple to use the agent for cleaning the valve and nozzle of a foam gun. However, the agent may damage certain plastic materials, varnished surfaces and textiles, thus avoid spraying the cleaner on surfaces that do not require cleaning. An efficient solvent and cleaning agent For optimum results in cleaning foam guns: Clean the gun mouth. Fix the bottle of the cleaning agent to the gun make sure that the seal at the nozzle is connected with the tube end of the cleaning gun. Clean the gun by pulling the trigger. Cleaning agent is not effective on dried foam.
