Maston Underbody coating is a quick-drying bitumen-based protector for your car's chassis. It is flexible, hard-wearing, and provides excellent protection against rust. Instructions: Clean the surface carefully. Cover all surfaces that do not require treatment. Recommended operating temperature +20 °C. Apply a 2-3 mm thick layer with a brush or spatula. Drying time: 4-5 hours (20 °C). Thinning / cleaner: Maston Thinner.
