WATERBASED CLOU WOOD FILLER is easy to use for filling holes and smoothing uneven surfaces. The filler is designed for untreated wood surfaces. It can also be used in damp rooms. Objects treated with the filler can be polished, planed, filed, sawn and turned.

The package contains a handy 60g tube and a spatula. Also suitable for staining surfaces when the color of the filler is selected according to the color of the stain. (light wood / dark stain - dark filler). The colors are miscible if necessary.

The wood filler dries quickly, does not shrink, an approximate drying time of about 2 mm / h, always depends on the size, depth and drying conditions of the filled area. Moisturize the treated cavities with water. Apply the wood filler with a spatula. If the cavities are deep, you need to add several layers with wood filler. Let for each layer dry very well. Keep the tube tightly closed.

Suitable for use also in for example bathrooms.

Keep out of reach of children. Protect from freezing. USE ONLY INDOORS

BINDER: Waterbased

STORAGE STABILITY: 36 months
